FROM FILA THE TILING REVOLUTION

Lay, putty and leave everything clean in minutes!
A work in a workmanlike manner in compliance with the law.

INSTANT REMOVER is a new solution developed by FILA Research Laboratories in collaboration with Assoposa that will allow the installer to save time by managing to obtain perfect results and in line with the UNI 11493 standard for cleaning after installation.

Designed for large slabs, but also ideal for normal tiling, **INSTANT REMOVER:**

- Eliminates **fresh cement grout residue**, even effective on grout with additives
- Ideal for cleaning the back of **large format tile** prior to installation
- Perfect for **cleaning grouting tools**

RAPIDRY TECHNOLOGY: QUICK, NO FOAM, NO RISING NECESSARY!

Use during installation.

- Does not damage grout joints
- Does not damage or corrode aluminium and steel trims
- Safe for the installer and environment:
does not emit harmful fumes
- Use indoors and outdoors, ideal for floors and vertical surfaces

MAXIMUM YIELD, with 1 750 ml spray bottle:

- **Small full-field grouting format: 50 SQUARE FEET**
- **Medium format (es: 60x60cm): up to 200 SQUARE FEET**
- **Large format tile: up to 1,148 LINEAR FEET**

FOR PORCELAIN AND CERAMIC TILE, GLASS MOSAIC AND QUARRY TILE.

Instructions for fast and effective cleaning

After the grout has thickened and become opaque, according to the grout manufacturer's instructions (usually about 10 to 30 minutes), carry out an initial cleaning of the surface with damp sponge. Proceed with the final cleaning.

Spray **INSTANT REMOVER** evenly over the surface. Let sit for 1-2 minutes, depending on the type of material. Clean using a damp sponge trowel. For stubborn stains, repeat the above instructions after one hour. Refer to the grout manufacturer's instructions for indications about when the surface is safe to use.

RapiDry is a cutting edge technology developed in FILA's R&D Center.

Conceived to meet the needs of contemporary materials and surfaces, *RapiDry* technology allows the installer to save time in installation and everyday cleaning, allowing time optimization and a workmanlike result in line with UNI 11493: 2016.

RapiDry accelerates and eases cleaning during the tile installation and surfaces finishing phases, all through a complex blend of additives which advances the drying process, neutralizing product residue deposits.
